

The Formentera Council's Office of Transport has announced summer changes to the regulated parking scheme in la Savina. From Sunday May 1, the following changes to blue and green zone parking will take effect: drivers can leave their cars parked a maximum of one day in summer, as opposed to the three-day limit applied in winter. Residents of la Savina, however, can continue parking up to 15 days provided they park in green zone spots. A change will also take place in the hours during which regulated parking is enforced: the daily timetable—which in winter extends from 9.00am-12 midnight— will now be from 9.00am to 9.00pm.

The changes, said transport councillor Rafael González, reflect requests made by residents and tradesmen of la Savina after the first summer of regulated parking. The councillor also announced 45 new parking places in la Savina for scooters, a move motivated by the observation that demand for parking spots outpaced availability. As set out in a municipal ordinance to that effect, there will be a maximum of three scooter parking areas in la Savina.
