

The Office of Sport of the Consell de Formentera is pleased to announce that it has begun preparing the Values Plan for the 2023-2024 academic year, including the launch of Nena i Esport, an online platform that architects of the project hope will work in tandem with local schools. Paula Ferrer, sports councillor, explained that the goal is "to use sport and [the] platform as tools to promote gender equality".

The platform will be used to propose activities encouraging girls, boys and actors around them to debate, investigate and reflect on gender equality in sport. The proposal supports teachers by offering practical and interactive activities designed for years five and six of primary school and years one through five of secondary school.

To encourage teachers of PE and other subjects, homeroom teachers and school administrations to participate, the Office of Sport has sent a letter with all the information and a form to schools.
