

The Formentera Department of Environment has teamed up with the non-government organisation Ocean Keepers, which earlier today kicked off seven days of scheduled cleaning this June on Formentera shores. The Eivissa-based non-profit describes its work as “positive change to reduce our footprint. [It’s about] greater awareness around the impact that our actions have”.

A seagoing crew will start this week in es Caló des Morts, moving to punta des Corb Marí on Wednesday, to Cala Saona a day later and, from Monday 22 June, setting sights on s’Espalmador, ses Illetes, Llevant and pas des Trucadors. Logistical support for the cleanup is provided by the Consell de Formentera.
