

The Formentera Department of Commerce has reprinted and updated an infographic highlighting the bars, restaurants and other establishments that are currently serving food for takeaway and delivery. The island remains in tier 2 of public health alert and businesses devoted to hospitality must close by 6.00pm.

Deputy premiere and commerce councillor Ana Juan applauded participating dining establishments for offering the service to locals and the island’s earliest visitors and “keeping the sector going the first weeks of the season”. In that spirit, the ‘Formentera To-Go’ poster has been translated into Spanish and English and will be distributed among businesses in tourism.
