

The Office of Tourism of the Consell de Formentera has put together a brochure of all the cultural, sports and active tourist activities on the island during the month of May. "In this way, we give visitors a guide where they can quickly find everything Formentera has to offer in the low season", said Alejandra Ferrer, vice president and tourism councillor.

A forthcoming activities calendar will focus on all the leisure options offered by the island's administration, associations and businesses--not to mention details on open accommodations and restaurants--toward the end of the high season. As Ferrer put it, "the ultimate goal is to have a programme with proposals covering 365 days a year". All this information will be included in a section of the Office of Tourism website and will be available at tourist information offices, as well as on social media, fairs and other promotions.

Activities agenda

The Consell's May tourist agenda features information and contacts with companies specialised in bicycle excursions, wine tasting, scuba diving, sailing boat rentals, horseback riding, wellness and health activities, birdwatching and environmental walks, gastronomic circuits, and more. It also includes the cultural and sports agenda.

"The idea is to foment year-round activities related to the natural environment, sports and culture; activities that promote the circular economy and diversification, and, at the same time, encourage local businesses to grow this offer. Programming like this is the best way to raise the island's profile", concluded the councillor.
