

Ten unemployed islanders aged 16 to 29 have started an occupational training course that the Formentera Office of Entrepreneurship is hosting for aspiring youth activity leaders. The classes are subsidised by the training and employment division of the regional jobseekers' office.

On a visit yesterday, Ana Juan, President and Councillor of Entrepreneurship of the Consell de Formentera, welcomed participants and said she hoped that the course, part-training and part-employment, would be useful to them.

Now that the established quorum has been met, the course will offer participants a combination of theory-based learning in the morning and hands-on activities in various centres of the Consell de Formentera in the afternoon.
