

Wednesday 29 June at 7.00pm, a presentation will be given of the Balearic Government's draft Energy Transition and Climate Change Plan so people can participate in preparations with first-hand contributions. The aim of these encounters is to shape the regional roadmap on how legislation will be deployed broadly, since this Plan must establish a crosscutting framework to orient and plan the objectives, policies and steps to comply with the Climate Change and Energy Transition Act, as well as accelerate the 40% reduction in polluting emissions in the Balearic Islands by 2030.
