

Pedestrian area in Sant Ferran gets upgrades

Wednesday, 14 February 2018 17:28

The Formentera Council's Office of Infrastructure and Mobility reports that from Friday, February 16, work crews will perform maintenance in the pedestrian area of Sant Ferran.

Upgrades, which involve repairs of shabby pavement, replacement of crummy street furniture and checks for faulty lighting, will also entail new pavement in front of the Sant Ferran church.

The work will cost €45,000 plus VAT and will be carried out alongside nearby upgrades currently under way at carrers València and Guillem de Montgrí. Both projects are expected to be finished by Easter.
